EXPERIENCE

[Reko](#) | Series B Startup – Ecommerce, Recommerce

Frontend Software Developer | Recommerce, Internal Tools

JANUARY 2023 - JUNE 2023

- Led and built UI internal web tools for desktop and tablet using React, Typescript, Styled Components, Jest, and Apollo – achieved 60% repeatability & reproducibility during initial user tests
- Led and built the Reko marketing landing pages using Storyblok with Nextjs, Typescript, and Styled Components
- Owned engineering effort for design team to build reusable, responsive, and dependable base components with Storybook
- Contributed weekly in right scope sizing for MVP product and provided mentorship to engineering, product and design team

Frontend Software Developer | Ecommerce

APRIL 2022 - JANUARY 2023 (Formerly [Oliver Space](#))

- Built foundational ecommerce website features for desktop and mobile using Vue 2 / 3, Vuex, and Typescript, including product pages, checkout flows, and account page interactions
- Collaborated extensively with the product and design team to establish a more organized, scalable, and reusable design system
- Proactively identified and implemented optimizations to enhance performance and accessibility via Lighthouse and A11ygator

[FieldEdge](#) | SaaS – Field Service Management Software

FullStack Software Developer | CRM, Dashboard

JANUARY 2019 - APRIL 2022

- Developed UI features and base components for desktop and mobile CRM application using Vue 2, Vuex and C#
- Successfully executed a language migration, transitioning the UI codebase from Knockout to Vue 2 – improving performance by 47%
- Addressed issues within the existing codebase to ensure a reliable and error-free environment – reducing tech debt backlog by 30%
- Led documentation for developer onboarding and UI best practices

FEATURED PROJECTS

- UI lead on recommerce marketing website using Storyblok and Nextjs
- UI lead on recommerce internal tools website using React
- UI lead on redesigned ecommerce checkout flow using Vue 3
- Owned the Engineering effort in building out design systems
