Krissy Conant

Senior Frontend Software Engineer

Atlanta, GA | 678-832-9442 | **krissyconant@gmail.com** | **Portfolio** | **LinkedIn** | **GitHub**

FEATURED EXPERIENCE

ecommerce, CRM, dashboards, internal tools, landing pages, design systems, language migrations, UX

UI lead for: recommerce marketing website using Storyblok and Nextjs, internal tools website using React and Apollo, ecommerce checkout flow migration from Vue 2 to Vue 3, building out design systems end to end with Storybook, writing onboarding and UI best practices documentation

WORK EXPERIENCE

Reko | Series B - Ecommerce Startup | Remote (Company dissolution JUNE 2023*)*

Frontend Software Developer | Recommerce, Internal Tools   *JAN 2023 - JUNE 2023*
- Led UI development of internal web tools for desktop and tablet, using React, Typescript, Styled Components, and Apollo. Achieved 60% repeatability and reproducibility during initial user tests
- Spearheaded development of engaging Reko marketing landing pages, utilizing Storyblok, Next.js, Typescript, and Styled Components
- Owned engineering effort to build reusable, responsive, and intuitive component library with Storybook for the design team, resulting in streamlined workflows and improved scope timeframes
- Contributed to scope sizing for MVP product and provided mentorship to engineering, product, and design teams on a weekly basis

Frontend Software Developer | Ecommerce (Formerly Oliver Space)   *APR 2022 - JAN 2023*
- Built foundational ecommerce website UI features, including product pages, checkout flows, and account page interactions, for desktop and mobile using Vue 2/3, Vuex, and Typescript
- Played a key engineering role in collaborating and communicating with product and design teams to establish an organized and reusable design system, resulting in improved development efficiency
- Drove new approaches with identification and implementation of performance and accessibility optimizations, utilizing Lighthouse and A11ygator to enhance overall website functionality

FieldEdge | SaaS - Field Service Management Software | Atlanta, GA

FullStack Software Developer | CRM, Dashboard   *JAN 2019 - APR 2022*
- Engineered core CRM website features, including a consumer portal, dashboards, and scheduling widgets, for desktop and mobile using Vue 2, Vuex, and C#
- Successfully executed a language migration, seamlessly transitioning the UI code from Knockout to Vue 2, resulting in a 47% performance improvement
- Proactively addressed issues within the existing codebase to ensure a reliable and error-free environment, significantly reducing the tech debt backlog by 30%
- Led the creation of comprehensive documentation for developer onboarding and UI best practices

TECHNICAL SKILLS

Languages and Frameworks: JavaScript, TypeScript, React, Vue 2, Vue 3, Nextjs, Knockout
